CV & Portfolio

[Link](#)

I have been designing **for 5+ years** (including 3 years of UI/UX). I am the head of design direction in the finance department of the largest bank in Eastern Europe. We are designing a financial platform (web/mobile).

My favorite style is a concise, simple, informative and useful design.

I am also a student of the largest IT company on a course "Frontend-development".

UI / UX Design

DESIGN

More than 100 presentations

2011 - 2016
 Sber (Financial Management Division)

Financier

Creation and automation of financial statements

More than 10 UX researches

Frontend Dev

DEV

Current level: React (JS) Junior

2 years of experience

ES6+ HTML / CSS GIT REDUX
MobX WebPack Algorythms Agile

Why am I studying frontend development?

Over 10 projects

<https://github.com/Gelskirchen>

I think this is the future of the UI/UX profession.

Nowadays the frontend-dev for web involves knowledge of HTML / CSS (f.e. flex, grid), and working with events / states (JS).

In addition, it develops the brain and helps to think outside the box

That's why my hobby is programming.

Student of the Yandex FRONT-END DEV courses

November 2021 - (July 2022)

Education

Bachelor's degree

2004 - 2009

Accepted by

Computer Science in Economics
(GER) Angewandte Informatik in der Wirtschaft

University of Humanities
(GER) Universität für Geisteswissenschaften

2018

IELTS (Academic)
6.5

2019

Courses in C++ at Bauman Moscow State Technical University

2021 - ...

Google UX certified specialist

2021 - ...

Front-end developer
